Report of Independent Registered Public Accounting Firm

To the Board of Directors of
Clary Investment and Insurance Planning Corp.

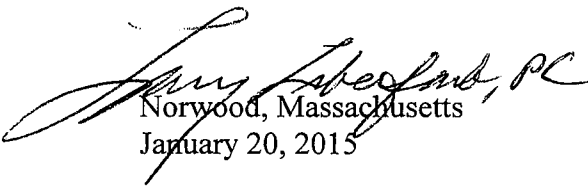

We have audited the accompanying statements of Clary Investment and Insurance Planning Corp. which comprise the statement of financial condition as of December 31, 2014, and the related statements of income, changes in stockholder's equity, and cash flows for the year then ended that are filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934, and the related notes to the financial statements and supplementary information. Clary Investment and Insurance Planning Corp.'s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Clary Investment and Insurance Planning Corp. as of December 31, 2014, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Schedule I, computation of net capital under Rule 15c3-1 has been subjected to audit procedures performed in conjunction with the audit of Clary Investment and Insurance Planning Corp.'s financial statements. The supplemental information is the responsibility of Clary Investment and Insurance Planning Corp.'s management. Our audit procedures included determining whether the supplemental information reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplementary information. In forming our opinion of the

supplementary information, we evaluated whether the supplementary information, including the form and content, is presented in conformity with Rule 17a-5 of the Securities Exchange Act of 1934. In our opinion the supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole.

CLARY INVESTMENT AND INSURANCE PLANNING CORP.

NOTES TO FINANCIAL STATEMENTS

December 31, 2014

NOTE 3 - FAIR VALUE

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of principal market, the most advantageous market. Valuation techniques that are consistent with the market income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The Fair Value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities the Company has the ability to access.

Level 2 inputs are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly.

Level 3 are unobservable inputs for the asset or liability and rely on management's own assumption about the assumptions the market participants would use in pricing the asset or liability. (The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.)

A qualifying asset or liabilities level within the framework is based upon the lowest level if any input that is significant to the fair value measurement. The Company's qualifying assets or liabilities are recorded at fair value using Level 1 inputs.

NOTE 4 - SUBSEQUENT EVENTS

Management has evaluated subsequent events through January 20, 2015, the date on which the financial statements were available to be issued. There were no subsequent events that require adjustment or disclosure in the financial statements.
